

PEG-900™

GRAPHITE EXTRA COURSE

Lubricant

Oil & Gas Drilling Fluids / WBM

PEG-900™ Graphite Extra Course is a natural graphite product with particle size ranges from 3,350 to less than 850 microns. Unlike very fine graphite, coarse graphite provides a bed of lubricating particles particularly useful in hard rock formations and in deviated holes. **PEG Graphite Extra Course** has less effect on mud rheology than fine graphite.

PROPERTIES, TYPICAL
